

Engage Workshops Onsite – July 21, 2023

Week 4

Institution–Westcliff University

Workshop: IT

Topic: Artificial Intelligence

Dr. Elnaz Khatmi & Michael Shane Tomblin

I am happy to share my revel in closing Friday's Engage Week workshops held on-site at Westcliff University in Irvine, California. The focus of this fascinating occasion is Artificial Intelligence (AI). The imperative subject matter revolved around the exciting combination of Innovation and Artificial Intelligence.

Among the events is Professor Tomblin unraveled the ancient improvement of AI and shed mild on its current effect throughout numerous sectors. He skillfully protected the subsets of AI, delving into the interesting AI Relationships and Landscape. The consultation endured with an in-intensity examination of diverse AI strategies, along with device mastering, Laptop imagination, and prescient. We were enthralled by way of how that present-day technology is revolutionizing industries like healthcare, finance, and advertising and marketing, bringing about terrific ameliorations.

The workshop really stood out, and Dr. Khatmi's presentation was a specific spotlight. AI is reworking facts evaluation, sample popularity, and selection-making strategies, leaving us with precious insights. Dr. Khatmi's dialogue on Biometrics, Binary styles, and LBP Techniques was mainly captivating, and she supported her points with compelling research work and assessment effects. Witnessing real-world examples of ways AI is carried out in numerous domains bolstered our understanding of its talents and ability. It superbly complemented our instructional getting to know on AI and showcased its relevance with business subjects. As all of us understand, in the contemporary international business landscape, AI is becoming a pivotal tool for groups aiming to distinguish themselves from competitors, making the workshop both timely and treasured for our academic and export boom.

In summary, the know-how I won through this workshop has considerably contributed to my personal and expert increase. I now have a better know-how of AI and its potential effect on various industries. The sports and realistic examples helped solidify my knowledge of the ideas mentioned. I need to explicit my sincere appreciation for the effort and hard paintings that went into t his workshop. It was really a valuable enjoy, and I am grateful for the opportunity to participate. I look forward to making use of the knowledge gained in my future endeavors.
